

# Green League

SPORT ALLIANCE FOR THE ENVIRONMENT

## What is Green League?

Green League is a project that wants to answer the needs of encouraging the population to take urgent action to combat climate change and its impacts and of promoting healthy lives and well-being for everyone, therefore using sport as a tool to generate environmental awareness while contributing to a healthier lifestyle.

## Aims

- Build the capacity of sports professionals at the EU level to promote outdoor physical activity as a tool to educate people on environmental matters.
- Delivering local sports events inspired by Nature's Four elements, promoting sport's practice while passing on a common environmental sense through experiential learning.
- Engaging sports clubs, young players, and amateur athletes by combining sports tournaments and environmental action.
- Organising awareness-raising actions promoting the tangible role sport can play in enhancing environmental consciousness.

the European Union

# What have we done so far?

## Beginning

In September 2022 the consortium of the Green League project met in Palermo, Italy and started the preparations for the beginning of the project.

Funded by  
the European Union

## January 2023- International collaborative workshop for sport professionals

International collaborative workshop was held in January 2023 in Slovenia with the participation of 6 sport professionals from 5 European countries that gave their valuable inputs to the development of the **Green League Model**.

# What have we developed so far?

## Green League Model

The Green League model is a framework that sport organisations and sport professionals can use to promote sustainable and environmentally friendly practices in sport. It is a guide for the planning and realisation of environmentally sustainable sports events, thus promoting environmental awareness and education.

## Case Studies

Environmentally-aware existing successful sport-based practices and initiatives at EU level. It is aimed at inspiring you.

## Training Package

The Sport and Environment Training Package is aimed at building the capacity of sports professionals by promoting outdoor physical activity as a tool to educate people on environmental issues.

**Visit the “[results](#)” section of our website for the materials produced**

## What are we going to do?

- **Nature's Four Elements sport events:** 8 local sport events inspired by 4 natural elements to promote sport practices while passing on a common environmental sense. Sport professionals/amateurs, young people and their families, will reflect on how sport impacts on the environment and the possibility of shifting its influence towards increasingly sustainable means.
- **Green League's Local Tournaments:** mini-tournaments of team sports and relay races that combine sport with environmental actions.
- **Green Champions Campaign:** awareness raising campaign, composed by video series and a final video documentary, to promote the role of sport in enhancing environmental consciousness.
